They say a horse should always eat the type of hay he wants,  
So why's he rolling on the ground without a good response?  
To banamine or xylazine, no medications help,  
His Ileum's impacted and peristalsis can't be felt.

He was rollin' in pain 'cause of all the sand he was holding inside,  
I put my ear on his abdomen and thought I could hear the tides.  
Thought this was neat and did not think I should care,  
I just wish I had known that his intestines just might tear!

My horse is refluxing and I don't know why,  
He's got wounds all over his face and his eyes.  
Now he's rolling and he's pawing and I don't know what to do,  
Since hindsight's twenty-twenty, I have this lil' advice for you:

I'm singing "F" to the "R" to the "E" to the "E" to the "C" to the "O" to the "L-I- C."

Well my horse is a rollin' he's pawing and moanin'  
But he can't tell me his tummy feels bad.  
So now instead of sitting in a nice vet's office,  
I'm digging a huge grave with my mom and dad.

He had a displaced intestinal loop out of place,  
But now he's dead because I didn't know all the signs.
